

ROSHNI BARODIYA

Ashta, Indore(MP) · roshnibarodiya1@gmail.com · +91 8770188698 · LinkedIn · GitHub

SUMMARY

Cyber Security-focused Computer Science student with hands-on experience in designing and developing secure applications and implementing modern security practices. Skilled in identifying vulnerabilities, securing APIs, and applying authentication and authorization mechanisms such as JWT and role-based access control. Experienced in building security-driven systems using Node.js, Express, and MongoDB, with a focus on data protection techniques including hashing, input validation, and secure data handling. Familiar with cybersecurity principles such as secure system design, threat mitigation, and OWASP-based practices. Strong interest in ethical hacking, secure architecture, and building resilient systems, with a passion for continuously learning and applying real-world cybersecurity solutions..

SKILLS

Java, JavaScript, DSA, OOP, Node.js, Express.js, MongoDB, API Integration, React.js, SHA-256 Hashing, Secure Data Handling, OWASP Security Practices, Vulnerability Awareness, Secure System Design, JWT Authentication, Role-Based Access Control (RBAC), Secure API Development, Git, GitHub, Linux.

EXPERIENCE

Developer Intern

Pest Control, Indore

Nov 2025 – Dec 2025

- Optimized frontend structure and UI components to enhance user experience and engagement. sources.Managed product data via dashboards, ensuring consistency and responsive performance.
- Collaborated with teams to improve workflows and streamline digital operations. Resolved UI and performance bottlenecks to enhance system efficiency.

PROJECTS

Blockchain Document Verification System

HackStasy 2025 SRM-Delhi NCR

- Designed a lightweight, multilingual frontend optimized for low-bandwidth rural users, improving accessibility and usability. Applied secure system design principles by preventing raw data exposure and ensuring tamper-proof verification.
- Implemented client-side SHA-256 hashing to ensure data integrity, storing only cryptographic hashes on-chain to preserve user privacy. Developed a React-based dashboard to display real-time document verification status.
- Built secure authentication using MetaMask integration with Ethers.js, enabling decentralized identity verification.

CloudNotes AWS System

- Engineered a cloud-native MERN application with secure JWT-based authentication and fine-grained role-based access control (RBAC), Developed scalable backend architecture using Node.js, Express, and MongoDB, enabling efficient data handling and API performance.
- Deployed and managed backend services on AWS EC2 with S3 integration for secure, durable, and scalable storage, implementing input validation, middleware-based request filtering, and protected API endpoints.

Live Demo

TruthLine – Decentralized News Verification

- Architected a decentralized news verification platform using trust-based scoring and multi-source validation to detect misinformation, preventing data tampering and strengthening system reliability.
- Designed and developed high-performance RESTful APIs using Node.js and Express, ensuring secure and efficient data exchange, Integrated SHA-256 hashing for content immutability.
- Enhanced backend efficiency through optimized request handling and concurrency control, improving scalability under load.

Live Demo

EDUCATION

Vellore Institute of Technology

Integrated M.Tech in Computer Science Engineering (Specialization: Cyber Security) CGPA : 8.40

Bhopal

2022 - 2027

Model H.S. School

Higher Secondary-PCM(Physics, Chemistry, Mathematics) Percentage:84.4

Ashta

2021 - 2022

CERTIFICATIONS

Top 40 Teams out of 200 teams at Hackstasy

Smart India Hackathon 2024

Cisco Networking Academy

Cybersecurity Skilling Program

2025

Internal Finalist

Ethical Hacker Certification

IIT Kanpur
